Sriracha

Creative Director: Christine, Designer: Katie

- I prefer the first iteration
- The footer feels a little overpowering in the desktop version - maybe shrinking it down to what it is in second iteration? - but also incorporating the address and contact info
- I really like the tilted lines in the second iteration - would love to see it incorporated in some way in the first iteration
- I like the logo in the nav bar - maybe having it spin when hovered on?
- Also could see the green stars spin around but might be difficult to implement
